***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: Applicants' process for producing bisphenol A is patentably distinct because the prior art of record does not teach or suggest the invention as presently claimed, wherein the bisphenol A/phenol-adduct slurry solution is filtered under reduced pressure in an atmosphere of an inert gas stream at 30 to 80<sup>0</sup> C, containing oxygen in a concentration of at most 5,000 ppm. Additionally, applicants have shown unexpectedly (see Examples) that when the bisphenol A/phenol-adduct slurry solution is filtered under such conditions a more pure bisphenol A/phenol-adduct is obtained. All claims (1-4) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
